SOLUTIONS FOR RESIDENTIAL HEAT PUMPS

Dixell presents the **IC200** parametric controllers and the **iPro**: programmable controllers: these are the solutions for a complete heat pump management (air/air, air/water, water/water, geothermal) and for the residential plant integration.

- Water production for heating and cooling
- Sanitary hot water production with priority management
- Geothermal free cooling
- Solar panel integration
- Humidity management
- Anti-legionella cycle
- High connectivity in remote mode also via GPRS
